WBC TO LIVE BETTER

WBC
SAFER SPACE, BETTER LIFE

Well Control Building (WBC) is a company that uses AI to create safer and better buildings for people.

WBC solution is the only AI in the market that proactively engages with the HVAC system. With WBC AI control, your HVAC knows what is going to happen even before yourself.

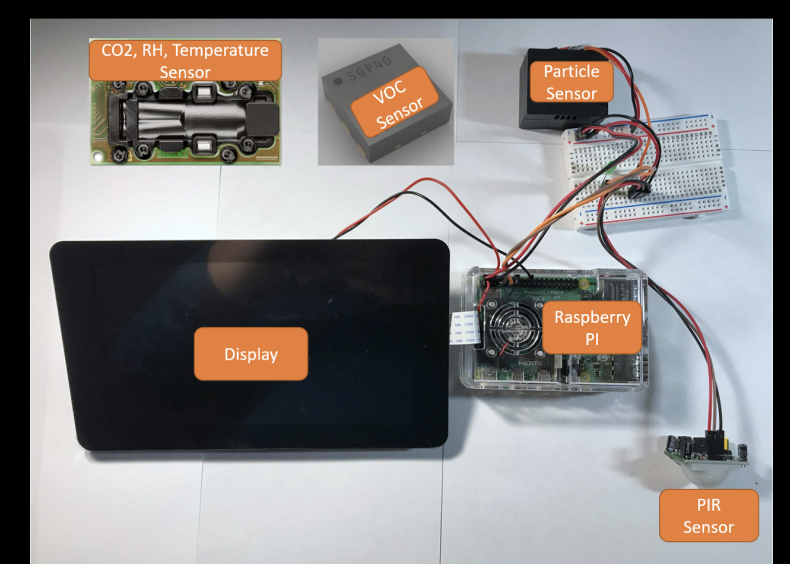

WBC developed an AI-based predictive IAQ and energy control solution to optimize the energy consumption and indoor air quality at the same time.

Our algorithm can control the virus infection risk within 0.007%~0.008% now. We are working on making it within 0.005%~0.006%!

Take a close look at our prototype! We identified a building in Syracuse University Campus for our first demo project.
