

# Aerotrack

## An **iOS Mobile App** for Wind Turbine Monitoring

Joseph Patrick Zoll

### Our Vision

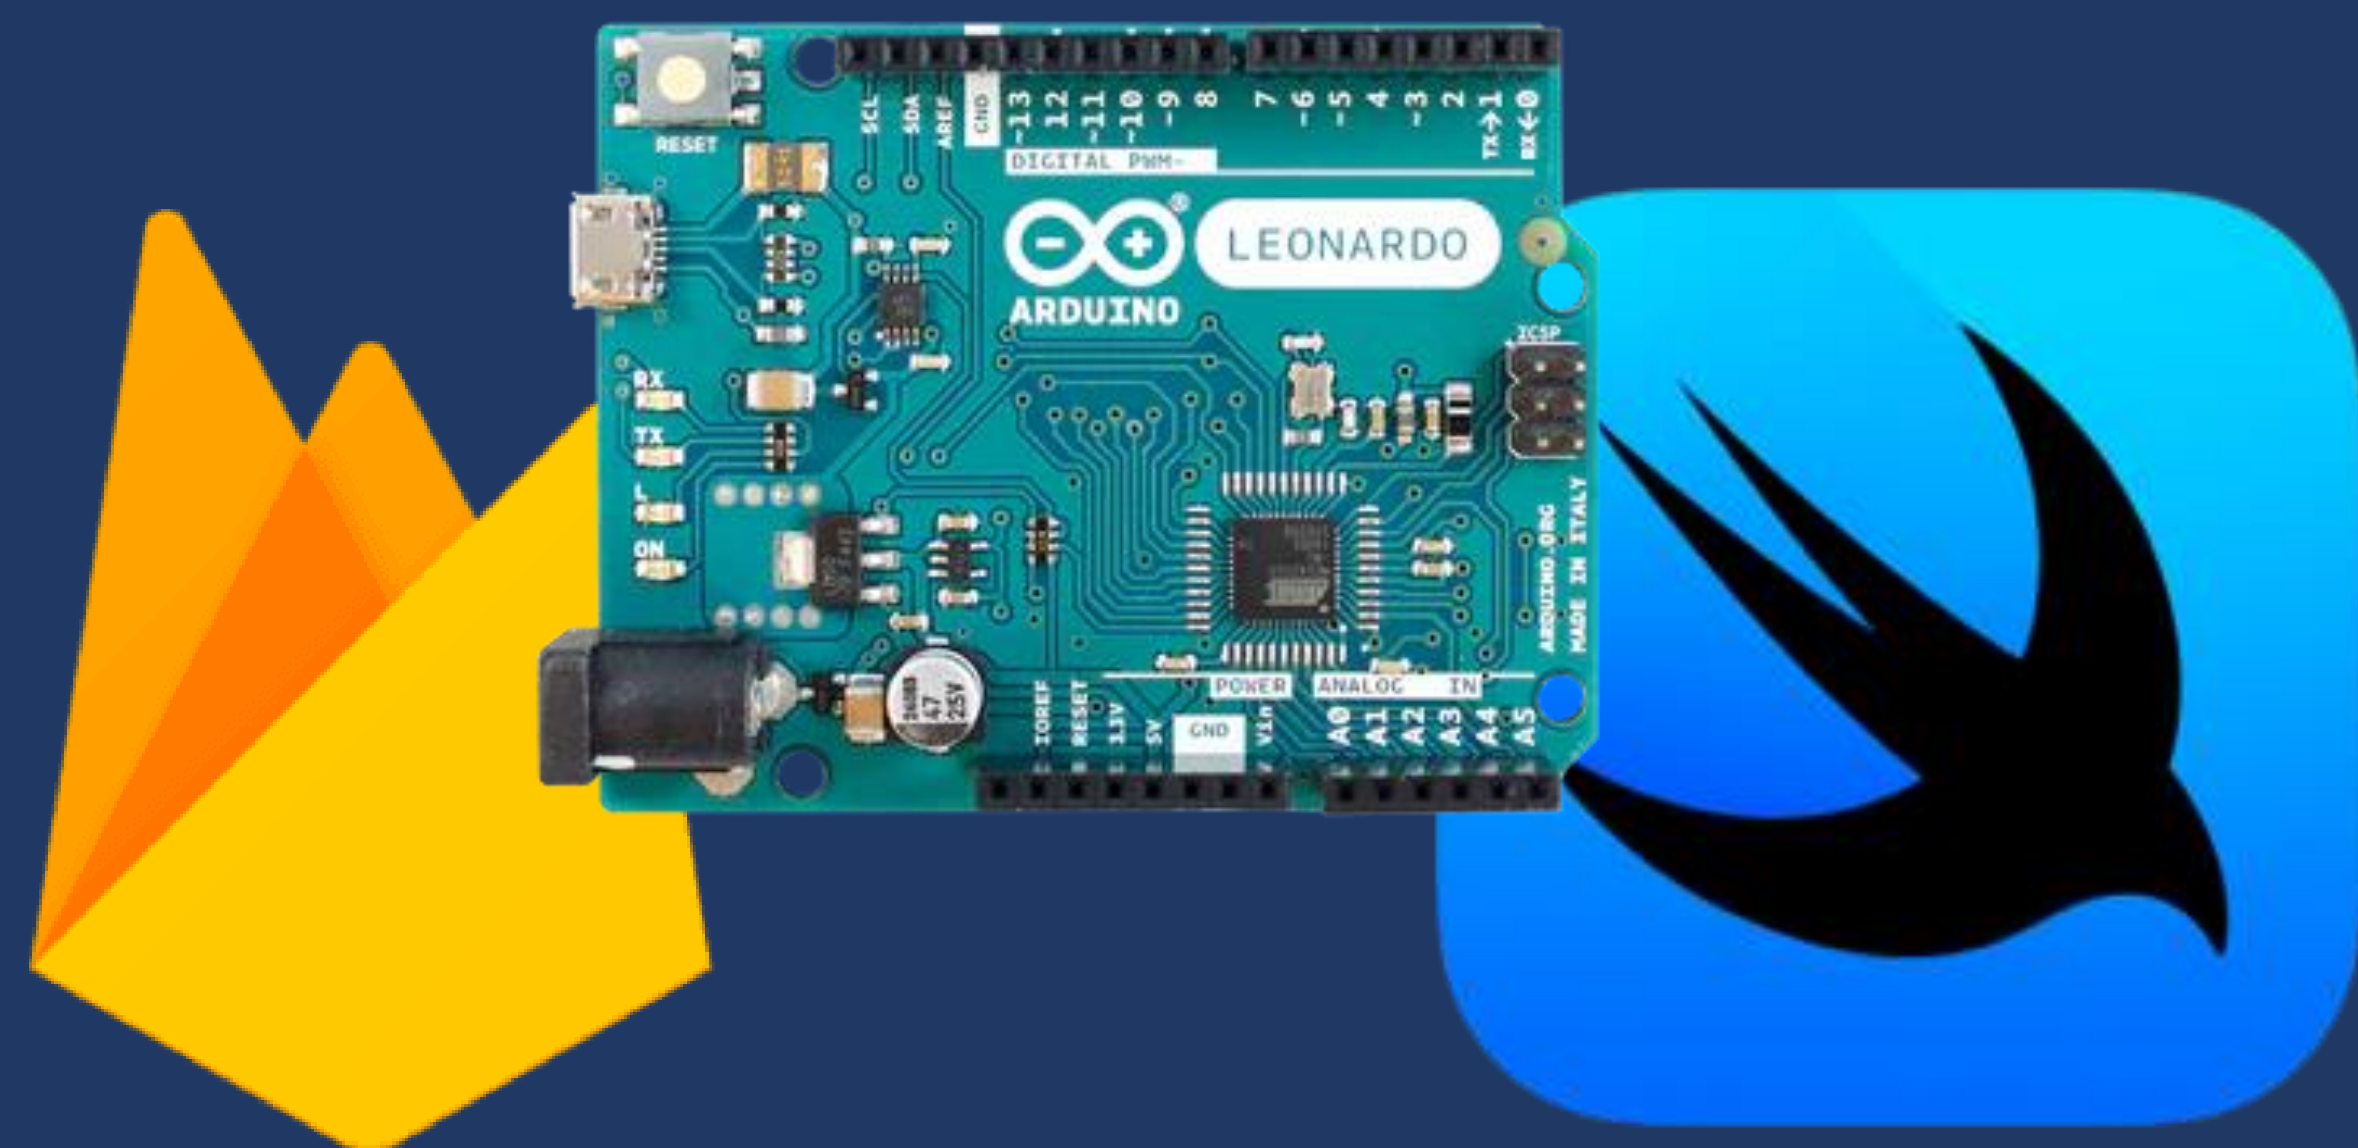

Make possible 100% availability of renewable energy 100% of the time, and so eliminate the need for any fossil fuels to generate electrical energy.

### The Aerovec Solution

A compact wind turbine that easily integrates with solar and storage, monitored in real-time.

### Mobile Monitoring

An iOS app built in SwiftUI. This is Apple's modern framework used for building iOS, macOS, watchOS, and tvOS applications. This app is designed to monitor real-time wind turbine data by using Google Firestore, a cloud-based database.
